

# A Digital Gauge for Tough Applications

**Proquip, Inc. has a fully licensed Ashcroft assembly and repair shop in house!**

*Call Us today for:*

- *Diaphragm seal assembly.*
- *Instrument liquid fills*
- *Instrument calibration traceable to N.I.S.T.*
- *Custom capillary assemblies/filling*
- *Gauge accuracy matching.*
- *Repair/Calibration Contracts (Annual or Periodic)*
- *Mercury Manometer Vacuum Gauge Testing.*
- *Hydraulic Burst Testing up to 40,000 PSI.*
- *Panel Manufacturing*
- *Set Point Adjusting & Testing of pressure switches, Pressure Reducing Regulators, and Back*

The Ashcroft® digital industrial gauge is designed for use in a wide variety of tough environments.

It comes with a choice of three case styles: All-welded stainless steel, fiberglass reinforced thermoplastic or cast aluminum. The digital industrial gauge is weatherproof and has an IP65 NEMA 4 rating (pending).

FM certification (Class 1, Div. 1, pending) is available with stainless steel or aluminum case styles, and a clear polyester window shields the gauge face from damage. Strain relief protects the wiring during battery changes.

Safety features include pressure ranges on the keypad and a bar graph to reduce the possibility of accidental overpressure. Proof pressure equals two times the gauge range, and it meets ASME B40.7.
