Set up services available!

## BM 70 A 4-wire Level Radar

**Reliable measurement under hazardous conditions, of tanks with agitators or other internals.**

- Available interfaces; Hart, RS-485, Profibus-PA, Fieldbus Foundation
- Max allowable operating pressure 400Bar/ 5800 Psig.
- Straight, rectangular, and S-shaped antenna extensions.
- Measuring Range up to 100 meters/ 330 ft.
- A variety of antennas available

## BM-702 2-wire Level Radar

**The first and only FMCW Radar Level Gauge with 2-wire technology. Non-contact alternative to ageing technologies.**

- High accuracy and repeatability
- Optional Display
- Hygienic connections available
- Various antenna designs in various materials
- Measuring range 20 meters / 66 ft.

### **Flexibility through modular design.**

The unit consists of:

- Converter
- Flange
- Antenna

**The converter can be replaced without interrupting the process, without purging the tank, and without having to discard the cleaning agent as industrial waste.**
