

Sight Flow Indicators & Sight Windows

Penberthy offers one of the industry's most complete lines of sight flow indicators and sight windows with our FLUIDVISION™ product line. They include ANSI, Teflon®/Tefzel® lined, FM approved dual-window, armored, full-view, threaded window and low-flow gaseous models. All popular sizes and materials of construction available, with flanged, threaded and special connections, as well as rotator, flapper, drip-tube or plain indicator styles. Also includes threaded, oblong and conventional sight windows.
